

<Hello World />

I'm Ruby, an Engineer turning ideas into products that scale.

Developer

Engineer

Architect

Security Clearance

18+ years delivering high quality digital products as a solutions architect and lead engineer. I turn business goals into blueprints and ADRs, prove the risky parts with working proofs of concept, then build the hardest components and lead the team that ships the rest. Lately that means AI that earns its keep: LLM pipelines, embeddings, and voice agents in production.

// the arc

2006 · Infrastructure

Pre-sales systems engineering. 100,000+ server estates, migrations, SOWs.

2015 · Software

Full-stack engineering. React, TypeScript, Node, cloud native from day one.

2021 · Leading builds

Tech lead and senior roles. Architecture, code review, teams shipping.

2023 · AI in production

LLM pipelines, embeddings, voice agents. Shipped, measured, and paying rent.

// select work

Healthcare payer platform

Senior Engineer · 2025 - Present

Took over a production Epic payer platform, fixed a silent data corruption defect, and ran the go-live: 30,000 facilities and 80,000 providers with phase-by-phase verification.

Salesforce automation engine

Consulting Engineer · 2026

An AI engine that reads solution design documents and configures orgs deterministically, with confidence-scored changes and human mediation.

Pharmaceutical Marketplace

Lead Engineer · 2025 - 2026

Stripe Connect payments end to end on a two-sided pharma talent marketplace. A 54,000 line refactor, an AI matching engine, and a voice interview system in production.

DHS application rebuild

Senior Engineer, with Proveo · 2022 - 2023

Fully rebuilt a critical DHS production system in TypeScript, React, and Next.js on AWS under FedRAMP. Owned the architecture, the implementation, and the team.

Independent Software Engineer & Consultant

RubyJasmin.com · 2017 - Present

The practice behind the selected work overleaf. Also: Fanpal.tv, a Twilio platform rescued from performance failure by re-architecting synchronous webhooks into an async pipeline (2024). Kromatic.com / DoD, educational React and Next.js applications deployed into public and classified environments.

Full Stack Tech Lead

Proveo Automation · Dec 2022 - Jul 2023

Led cross-functional teams and the technology roadmap. With DHS, fully rebuilt a critical production system in TypeScript, React, and Next.js on AWS under FedRAMP, owning the architecture, the implementation, and the team.

Senior Software Engineer

Strides Development · Sep 2021 - Oct 2022

Architected 5+ end-to-end applications on React, Next.js, and Expo over AWS, GCP, and Firebase. Took cross-platform mobile apps from boilerplate to production and introduced code review standards and Git workflows adopted team-wide.

// the enterprise decade

Collabera · Web Developer · 2017 - 2018

Contract web development. Dynamic pages and single-page applications in React and Redux with ES6/ES7 and Webpack builds deployed to AWS.

Ten-X (Auction.com) · Miami · 2014 - 2017

Principal engineer on internal system analysis and design. Led three business projects from requirements to implementation for 35 local and 1,000+ remote users. Earlier, managed commercial real-estate transactions end to end in Salesforce.

Hewlett Packard · Remote · 2012 - 2013

Wrote 1,000+ lines of VB and PowerShell automation for HP Server Automation in a 100,000+ server environment. Designed and documented automation projects for Midrange Services.

IT-Dynamix · Las Vegas · 2011 - 2012

Planned and architected P2V/V2V migrations across 500+ servers. Audited 300+ machines in two casino data centers, producing runbooks and diagrams. Presented SOWs for server and storage migrations.

Also in this era: Saxton & Bluepoint (Boca Raton, 2006 - 2011), pre and post-sales systems engineering across Active Directory domains, VMware ESX estates, Windows Server, IIS, SharePoint, and SQL Server, with customer consultations and SOW/SAW documentation.
